

CA WING SUPPLEMENT 1

CAPR 52-16

1 November 2011

Cadet Programs

CADET PROGRAM MANAGEMENT

CAPR 52-16, 1 February 2011, as corrected and changed is supplemented as follows:

2-5.d Added. Providing Intoxicants. Except as noted below, within California Wing, no member may provide intoxicants to cadet members regardless of duty status, while at a CAP activity or elsewhere, or while in uniform or not. Providing intoxicants is defined as purchasing for or selling to, or otherwise supplying alcohol or illegal drugs. Providing intoxicants is considered a form of physical abuse and the reporting procedures defined in CAPR 52-10 must be followed. There are two exceptions to this rule:

(1) *Family Setting.* This policy does not prevent members who are parents or legal guardians of cadet members from providing alcoholic beverages to their children within a family setting if otherwise permitted by law, provided this action does not occur at or immediately preceding participation in a CAP activity.

(2) *Religious Services.* Nor shall this policy prevent cadets from consuming alcoholic beverages as part of bona fide religious services customary to their faith.

2-11.b Within California Wing, the following policies and procedures will apply:

(1) Approvals shall be granted on a case by case basis, and be valid for each specific activity.

(2) Approval requests from squadrons and flights shall be directed to the appropriate group commander for endorsement and forwarding to the CAWG/CC. Approvals for wing activities will be forwarded to the CAWG/CC with an information copy to the activity location's group commander.

(3) CAP may not sponsor firearm-related events or matches.

(4) Ranges must be lawful facilities for the discharge of firearms. The full name of the range, address and phone number, must be stated in the request.

(5) The location of the nearest hospital or emergency medical facility must be stated in the request.

(6) Instructors must be current and approved.

(7) A safety briefing will be given to all participating members and CAP guests by approved instructor before each day of shooting.

(8) Cadets will be supervised at all times while handling firearms.

(9) Cadets are restricted to shoot shotgun or .22 cal rifles at civilian ranges. For encampment and other activities held at military installations, other caliber firearms (with the exception of "team-fired" and pyrotechnic rounds) may be used.

2-11.c In no case will "person-at-person" shooting such as paintball or Simunitions® be permitted during CAP activities in California Wing.

4-3.c Added. Application for Cadet Activities. The CAWGF 150, *California Wing-Application For CAP Activity* is used to apply for cadet activities held within California Wing. The form contains contact information, liability release agreements, unit commander certification

of the information provided and suitability of the cadet to participate in the requested activity, as well as brief medical and insurance data to be used in case of emergency. It is the policy of California Wing that all senior members and cadets attending overnight activities will submit a completed CAWGF 150 to the activity commander. Use of the form is mandatory for all cadet activities held away from the home unit of assignment. A copy of the form will be available at the activity for reference in case of medical emergency. Cadets under 18 years of age must have the permission of their parents or guardian to participate. Parent or guardian signatures must be witnessed and countersigned. All senior members and cadets over 18 may certify themselves on the liability release. All forms should be signed by the cadet's unit commander. Verbal permission of the unit commander will suffice, providing approval is verified by the activity commander and is annotated on the form.
